

KRUSHNA HARDE

+91-8888986336 | hardekrushna88@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [CodeChef](#) | [Codeforces](#)

Education

Pune Institute of Computer Technology, Pune

Sept. 2023 – Present

B.E. in Computer Engineering — CGPA: 9.27/10

KTHM College, Nashik – HSC | 75.50%

March 2023

New English School, Nashik – SSC | 92.20%

March 2021

Technical Skills

Languages: Java, C++, JavaScript, Go

Backend: Spring Boot, Spring Security, REST APIs, WebSocket/STOMP, Node.js, Express.js

Databases: PostgreSQL, MongoDB, MySQL, Redis

Tools: Kubernetes, Docker, Git, GitHub, Kafka, Maven, Firebase, Cloudinary, Swagger/OpenAPI

Experience

Engineering Intern — Platform9

Aug. 2026 – Present

Private Cloud Director – Kubernetes (PCD-K)

- Learning the architecture of Platform9's managed Kubernetes platform (**KA-API**, **CCP**, **HCP**, **Barista**) and control-plane interactions involved in cluster provisioning and lifecycle management.

Backend Developer Intern — Tenancy Passport

Jan. 2026 – Aug. 2026

Spring Boot, MongoDB, Microservices

- Optimized **Typesense** search latency by **83%** using **RBAC** pre-filtering, eliminating application-layer filtering.
- Built a tenancy renewal system using **Spring Boot**, **MongoDB** compound indexes, and **Spring Scheduler** for automated lease rollovers and transactional integrity.
- Built an **event-driven** invoice notification pipeline with asynchronous processing, retry scheduling, and distributed locking for reliable email delivery; optimized microservice communication using **bulk APIs** to eliminate timeout issues.

Projects

FlashFlow – High-Concurrency Flash Sale Engine | *Spring Boot, Redis, Kafka, PostgreSQL*

GitHub

- Engineered a high-concurrency flash-sale engine handling **10,000+ concurrent requests** using **Redis Lua** and **Kafka**; sustained **5,000 RPS**, **p95 latency of 384 ms**, and **0% error rate** under **k6** stress testing.
- Implemented **Redis Lua** atomic inventory reservation with **two-layer idempotency** (Redis NX + DB constraint), preventing overselling under concurrent purchase workloads.
- Built an asynchronous **Kafka**-based order processing pipeline with sliding-window rate limiting and TTL-based stock rollback, improving scalability, reliability, and fault tolerance.

ChatNexus – Real-Time Chat Platform | *Spring Boot, WebSocket, MongoDB, Cloudinary*

GitHub

- Built a real-time messaging platform using **Spring Boot** and **STOMP/WebSocket** for bidirectional communication with **JWT**-based user authentication.
- Implemented message delivery, read receipts, user presence, and media sharing using **MongoDB** and **Cloudinary**, reducing server storage overhead.
- Designed a layered backend architecture with global exception handling, **Swagger/OpenAPI**, **JUnit**, **Mockito**, and **SonarQube**, improving maintainability and testability.

Achievements

- Solved **1700+** DSA problems, **160+** contests | LeetCode: **1964** (Top **2.9%**) | CodeChef: **3-Star** (1684) | Codeforces: **1252**
- **Rank 8** in Google Developers Hack-A-Bit among **500+** competing teams.

Leadership & Extracurricular

• **Technical Head, PICT Finance Society**

Mar. 2025 – Apr. 2026

Led development of the society website, optimized deployment workflows, and mentored junior developers.

• **Event Coordinator, PASC** – Organized workshops, hackathons, and PULZION's CODEX contest.

• **Chess** – District-level Under-17 player.
